DETAILED ACTION

Election/Restrictions

Applicant's response of March 6, 2007, with traverse to the Restriction requirement is noted. The arguments are persuasive and a revised restriction requirement is presented with this office action. Applicant's response to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a seasoning product, classified in class 426, subclass 589.
- II. Claims 5-16, drawn to method of producing the seasoning, classified in class 426, subclass 44.

Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product claimed (Group I, claims 1-4) can be made with another and materially different process, i.e., a process wherein "preparing a solid koji" is not required or wherein the addition of "lactic acid bacterium" is not required.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search and/ or the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
